* Estimate is based on a comparison of the second congressional district map to a ZIP code map of Anne Arundel, Baltimore and Harford counties and Baltimore City.

** Based on road distribution, it is estimated that about one-quarter of Harford County's new and prevalent HIV and AIDS cases are found in areas that coincide with Maryland's second congressional district.

† Approximately half of the ZIP code's cases are not in the second congressional district.

†† Portions of the ZIP code are located in an adjacent county.

††† Approximately half of the ZIP code's cases are not in the second congressional district and portions of the ZIP code are located in an adjacent county.
