Third Congressional District Estimated HIV/AIDS Incidence and Prevalence

(December 31, 2006)

* Estimate is based on a comparison of the third congressional district map to a ZIP code map of Anne Arundel and Baltimore counties and Baltimore City.

** Based on road distribution, it is estimated that about one-quarter of Howard County's new and prevalent HIV and AIDS cases are found in areas that coincide with Maryland's third congressional district.

† Approximately half of the ZIP code's cases are not in the third congressional district.

†† Portions of the ZIP code are located in an adjacent county.

††† Approximately half of the ZIP code's cases are not in the third congressional district and portions of the ZIP code are located in an adjacent county.
