

GBHHSPC | June 16th 2015 Presenters Q&A

Responses from Colin Flynn, Chief, Center for HIV Surveillance, DHMH.

1) Does the current population of MSM/IDU have a greater risk of infection in the Baltimore-Towson Metropolitan Area (in comparison to over the past 10 years)?

The numbers of new diagnoses among IDUs have been dropping and this includes the MSM/IDU as well.
